

Hands on Training Workshop with Peta Clarke.

Canberra, Saturday 30 June & Sunday 1st July 2018

Saturday 30th June 10:30 - 5:30 (approx.) Saturday is aimed at all dog owners who are keen on learning more about how dogs learn and natural dog behaviour. We will divide the day up between discussions and practical training sessions. This is a wonderful opportunity to learn just how amazing your dog is! Each dog and handler team will have three training sessions through out the day where they will work individually for us all to observe and learn from.

Sunday 1 July 9:00 - 4:00 (approx.) Sunday is our behaviour nerd day! Aimed more at the professional dog trainer, class instructor or anyone interested in gaining a more in depth understanding of applied behaviour analysis in dog training and problem solving. We will look at the information coming to trainers from the world of the brain sciences and how we piece all this information together to give dog owners and ended dogs the very best advice we currently can. We will divide the day up between discussions and practical training sessions. Each dog and handler team will have three training sessions through out the day where they will work individually for us all to observe and learn from.

Peta has been a professional animal trainer for over 25 years. While her main love will always be dogs, Peta has worked both in Australia and North America as an animal trainer and consultant to the zoo industry working with many different species of animals, like Turbo, the Giant Pacific Octopus she is pictured with here. It is this unique experience, her depth of knowledge of the application of science in everyday training and her expertise as a storyteller that makes her a stand out educator.
